

COMMENCEMENT CEREMONY LIVESTREAMING & COMPLETE EVENT PRODUCTION SERVICES

Everything you need for your commencement event, from pre-production to post-production.

Livestreaming

Increase your audience size by providing at-home viewers the opportunity to watch your event from anywhere in the world. Family and friends can enjoy your event and interact with other online viewers on any platform.

We will livestream a professionally produced show with broadcast quality graphics, music and video with up to 20 cameras from anywhere.

Large LED Walls

Help everyone at your venue can see all the action on the stage. Several LED wall sizes are available, with the largest portable units at 13'x23', allowing us to move to several locations in the same day, if needed.

Aerial Drone

Show a unique perspective of your ceremony from the air! We'll capture live aerial video shots of your ceremony and include it in your livestream

Audio

Crystal clear audio is important for audiences of any size. We'll do a site survey at your venue to assess appropriate coverage and plot speaker delay patterns for large audience sizes.

Staging

We can provide staging in any dimension or size to fit your venue. Railings, drape, and ADA ramps are all available.

Graduate Name Graphics

As each graduate goes across the stage to accept their diploma or certificate, their names will appear on screen to give each graduate the recognition they deserve.

E-ticketing

Manage venue capacity with our e-ticketing software. Prior to your event, graduates can reserve a pre-determined number of tickets online, request additional tickets, and distribute them to family and friends as needed. E-tickets are scanned on site with any Apple or Android device.
